

Walkabout

Walkabout offers a dynamic opportunity to learn and strengthen normal gait patterns and associated muscle groups.

The Walkabout is a posterior supported weight relieving walker, providing dynamic active support throughout the rise and fall of the pelvis during walking. It is front open to facilitate and enable activities. The wheels can be braked to initiate and strengthen standing.

Features :

- ◆ Directional control
- ◆ Anti reverse mechanism, with dampeners
- ◆ Rear brakes
- ◆ Frame tilt adjustment
- ◆ Pommel
- ◆ Adjustable chest and pelvic supports
- ◆ Height adjustable headrest
- ◆ Fine height adjustment crank
- ◆ Dampener control for the rate of spring return
- ◆ Anti tip wheels

Additional Options

- ◆ Forearm gutter supports with hand holds
- ◆ Abductor straps
- ◆ Saddle seat
